FOUNDATION HOUSE CAMHS

Refurbishment – Healthcare – NHS

Est 1946

Description of works:

Foundation House incorporates the “Out Patient” facilities of Somerset Partnership NHS, with a particular focus on mental health related issues. The first floor offices whereby these works took place contain the support teams of SOMPAR and its wider network of services across the county.

The works carried out included the upgrading of all mechanical and electrical services to the latest standards, demolition and alterations of layouts and new finishes throughout.

Works had to be carried out over two phases, with careful consideration given to the patients at all times, especially to ensure restricted access to the site area.

All works were completed on time.
